INTENTIONAL TEACHING POINT TWO

There are times when we should leave dogs alone

Background

Research clearly shows that there are certain situations where young children are at a higher risk of being bitten by a dog. Accordingly, the Program educates children not to approach dogs at these times and provides them with alternative strategies.

This should be taught in conjunction with Intentional Teaching Point Three – There are things we should not do to dogs.

Learning Outcome

The children understand that dogs should be left alone in a range of potential high-risk situations.
